FYI, NMED invited State Engineers and Department of Agriculture, Department of Game and Fish to the daily noon coordination call. So don't be surprised if they have questions and/or speak up.

Subject: Gold King Mine Spill Daily Conference Calls with EPA

Good morning,

Secretary Flynn requested that I forward the information regarding the daily conference call we have with EPA Region 6. We have been discussing sampling plans and results and would like to include you and/or your appropriate technical staff. The current understanding is that NMED will coordinate with EPA regarding the river, domestic well and drinking water issues. The State Engineer and Department of Agriculture will work with EPA regarding the sampling and treatment of ditches and the Department of Game and Fish will work with EPA regarding any wildlife considerations.

Please let me know who from each of your agencies should be the point of contact and if you have questions or concerns with this approach.

Angela Restivo at EPA is the host. The call is at 12:00 PM each day and the call in number is: 1-866-299-3188

Code: 214-665-2268

We look forward to working with you.

Trais Kliphuis
